Professional Summary

Passionate and dedicated Mobile Developer with experience building cross-platform applications for Android, iOS, and web using Flutter and Dart. Skilled in crafting intuitive user interfaces and implementing scalable state management solutions. Strong problem-solving skills, with a focus on writing high-quality, maintainable code aligned with business goals. A collaborative team player who thrives in cross-functional teams, continuously learning and adapting to new technologies.

Technical Skills

- **Languages:** Dart, Java, C#
- **Frameworks & Tools:** Flutter, Git, Firebase, CI/CD (GitHub Actions, Codemagic)
- **Mobile Development:** Cross-platform (Flutter), native (Android Java)
- **Backend:** REST APIs, Spring Boot (basic knowledge)
- **Architecture & Patterns:** State Management (BLoC, Provider, Redux, GetX), OOP, Design Patterns
- **UI/UX:** Responsive design, custom UI components, animations
- **Testing & Optimization:** Automated testing, debugging, performance optimization
- **Deployment:** App Store, Google Play Store
- **Agile Methodologies:** Scrum
- **Other:** Technical documentation, team collaboration, problem-solving, time management

Professional Experience

Mobile Developer
Maids.cc - UAE | 2022 - Present
- Optimize code for performance and reliability, reducing crash rates by **15%**.
- Participate in code reviews and debugging, improving code quality and reducing bugs by **10%**.

Mobile Developer
ElectroMall - Erbil | 2024 - Present
- Restructure app architecture to efficiently handle **9,000+** daily active users.
- Improve data sync across devices, boosting app rating by **0.5 stars** on the App Store.

Mobile Developer
Realistic Solutions - Saudi Arabia | 2023 - 2025
- Mentor junior developers in Flutter best practices, improving team productivity by **15%**.
- Optimize memory usage and reduce app launch time by **20%** through efficient coding.

Mobile Developer
DATUM - Iraq | 2023 - 2024
- Implemented innovative features in Flutter, contributing to **20%** growth in monthly active users.
- Co-created a social media app with over **1,000** downloads.

Mobile Developer
SellAnyAd - Germany | 2021 - 2022
- Implemented state management solutions, improving app maintainability and reducing bug reports by **25%** during QA cycles.
- Optimized API integrations, optimizing API response times by 25% through caching.

Android Developer
Tecomsa - Lebanon | 2020 - 2020
- Developed e-commerce mobile apps, increasing user engagement by **35%**.
- Cooperated with the backend team, reducing API failures by **30%**.

Android Developer
SCIT - Syria | 2018 - 2020
- Worked together with UI/UX designers to improve customer satisfaction by **25%**.
- Contributed to health and e-commerce apps, improving user retention by **10%**.

Education

Master's Degree - Web Sciences
Syrian Virtual University, Syria | 2019 - 2023

Bachelor's Degree - Informatics Engineering
Tishreen University, Syria | 2013 - 2018

Projects

ElectroMall
- Design and develop a modern, high-performance Flutter app featuring real-time inventory, advanced product search, and secure checkout.
- Leverage the latest Flutter technologies tailored for e-commerce (such as lazy loading, animations), resulting in a **30%** increase in user interaction and enhance UI responsiveness.

Google Play - App Store

Maids.cc
- Collaborate closely with the backend team to implement new features and refactor legacy code using Clean Architecture and state management (Bloc, Provider).
- Enhance UI responsiveness and data flow, improving overall app user experience by **20%**, as reflected in user feedback and app store ratings.

Google Play - App Store

Yaya App
- Rebuild and optimize core features using **Redux state management**, enhancing data handling and app scalability.
- Boost app performance and reduce crashes, leading to a **0.5-star** increase in Google Play rating and refine user satisfaction.

Google Play

Kelshimall
- Developed core features including product browsing, filtering, and secure checkout using Flutter.
- Enabled user uploads and real-time inventory updates, supporting **1,500+** active users monthly.

Google Play

Jenni Plus
- Developed and maintained a full-featured logistics app for managing orders, deliveries, and real-time tracking using Flutter and Firebase.
- Implemented role-based dashboards, improving operational efficiency and reducing order processing time by **35%.**

Google Play - App Store

MatrixCEX
- Developed a secure, real-time cryptocurrency trading app using Flutter, integrating advanced charts, order book management, and market data feeds.
- Prioritized performance and security, contributing to a **40%** reduction in app latency and improved user trust in app operations.

Google Play

Ard Alriyam Plus
- Streamlined workflows with real-time tracking, automated order assignments, and role-based access control, resulting in a **30%** reduction in delivery delays.

Google Play - App Store

Alrayapoet
- Enhance UI performance and stability, contributing to a **3.5** rating on app stores and strong user engagement throughout competition cycles.

Google Play - App Store

The Saudi Cup
- Integrate secure authentication, multilingual support, and real-time updates, ensuring a smooth experience for **10+** VIP attendees.

Google Play - App Store

Salam Education
- Developed a staff-focused Flutter app to streamline attendance tracking, scheduling, internal communication, and task management.
- Ensured cross-platform functionality and security, supporting seamless daily operations for **100+** educators and administrators.
